

11TH NASA SPACE EXPLORATION AND SPACE WEATHER WORKSHOP

MOON TO MARS – ARTEMIS 2024 INITIATIVES

October 17th, 2019
Building 3 Goett Auditorium
9AM-5PM

COME AND JOIN US!

The workshop is the continuation and expansion of NASA Space Weather & Robotic Mission Operations Workshops that have been held since 2009. As in the past several years, the workshop is arranged jointly by NASA Johnson Space Center Space Radiation Analysis Group (SRAG) and the Community Coordinated Modeling Center (CCMC) here at NASA GSFC, and it will include discussions covering both human space exploration and robotic missions activities. This year the workshop will be focusing on the Moon to Mars & Artemis 2024 exploration initiatives and the associated space weather challenges.
