1. Catholic University of America, Washington, DC 20064, USA
2. NASA GSFC, Space Weather Laboratory, Greenbelt, MD 20771, USA

Now and in future

- Some collaboration already ongoing at some levels, e.g., GIC studies.
- SANSa undergoing expansion and need to develop the next generation of researchers.
- SANSa hosts a large selection of ground-based space weather data.
- Summer school – Boot camps.
- Boston college – ICTP joint program for space science in Africa.
- Other international initiatives, e.g. ISWI, SCOSTEP and IRI.
