CME metadata ideas

defines CME, CME analysis, and CME arrival

	Comments
CME Arrival Forecast	<p>Represents when a CME will or won't strike a celestial object. An arrival forecast is associated with 1 CME, 1 Enlil run & 1 celestial object.</p> <p>There may be multiple forecasts for the same CME, Enlil run, & celestial object.</p>
CME ID	
Creation time	
Liftoff time	
Longitude	
Latitude	
Radial speed (km/s)	
Half angle	
Time at 21.5Rs	
Type	halo, etc
Source	
Source location	
Comment	Open text
CME Arrival Observation	Arrival of a shock at L1
Celestial body	Earth, Mars, Mercury, Venus
CME_id	

CME version	Versions of a CME represent an observed CME & its evolution over time (as forecasters receive more data). CMEs have a history which is tracked, i.e. Each CME has a number of fields associated with the CME, & a number of fields associated with a 'version' of it.
Creation time	
CME arrival time	
Leading time	
Trailing time	
Enlil run date	
Strike	Hit, miss, unclear, merged, not predicted
Comment	open text

CME metadata scheme

defines CME

Select Catalog :

SWRC_CATALOG

Enter start time in format (yyyy-MM-dd'THH:mm'Z' i.e. 2012-07-12T16:52Z) :

--- Select ---

Associated Instrument :

- SOHO: LASCO/C2
- SOHO: LASCO/C3
- STEREO A: SECCHI/COR2
- STEREO B: SECCHI/COR2

Additional Detecting Instruments :

Source Location (e.g. N11W89) (optional) :

Active Region Number (e.g. 1632) (optional) :

Source Signature Keyword :

- Flare
- Double ribbon flare
- Post eruption arcade
- Filament eruption
- Moving/Opening field lines
- Brightening
- Dimming

Morphology Keyword :

- Flux Rope
- Flux Rope and Shock Candidate
- Loop
- Loop and Shock Candidate
- Jet
- Jet and Shock Candidate
- Other
- Other and Shock Candidate
- No Detection
- No Detection and Shock Candidate
- Preceding
- Preceding and Shock Candidate
- Unknown
- Unknown and Shock Candidate

Note Keyword :

- 3-part structure CME
- Current sheet
- Possible collision with previous CME
- Likely deflection of the event within the FOV
- CME exhibits dimpled front
- Faint event; may affect type assignment
- Event fails/disappears before exiting COR2
- Front Bright front; may be evidence of pileup
- Data gap
- Bright emission (likely H-alpha emission)
- Halo CME
- Keyhole-hole shaped CME
- Outflowing material at the back of the CME
- Event partially overlaps with another CME
- Prominence material (filamentary structures)
- Streamer Blowout following CME
- Solar Energetic Particle event
- Side-lobe Operations
- Surge-like eruption

Select Catalog :

SWRC_CATALOG

Select as the most accurate measurement?

TRUE

Select Measurement Technique :

--- Select ---

Select Detecting Instruments :

SOHO: LASCO/C2

SOHO: LASCO/C3

STEREO A: SECCHI/COR2

STEREO B: SECCHI/COR2

Select Image Type:

running difference

Longitude (degree) :

Latitude (degree) :

Speed (km/s) :

Speed measured at height (Rs):

HalfAngle (degree) :

Enter Time 21.5 in format (yyyy-MM-dd'T'HH:mm'Z' i.e. 2012-07-12T16:52Z) :

Minor half-width (degree) :

Tilt (degree) :

Info/Session URL:

SWRC_CATALOG

TRUE

--- Select ---

SOHO: LASCO/C2

SOHO: LASCO/C3

STEREO A: SECCHI/COR2

STEREO B: SECCHI/COR2

running difference

Note :

Select the level of data (0=real-time, 1=real-time checked, 2=science level data analysis)?

0

Measurement Feature Code(s) :

- Leading Edge
- Trailing Edge
- Right Hand Boundary
- Left Hand Boundary
- Black/White Boundary
- Prominence Core
- Disconnection Front
- Shock Front

SIDC metadata
